

ENGLISKI JEZIK

EKSTERNA PROVJERA ZNANJA UČENIKA NA KRAJU III CIKLUSA OSNOVNE ŠKOLE

UPUTSTVO

Test iz stranog jezika sastoji se od čitanja, leksike i gramatike i pisanja.

Vrijeme rješavanja testa je 60 minuta.

Dozvoljeni pribor su grafitna olovka i gumica, plava ili crna hemijska olovka.

Priznaju se samo odgovori pisani hemijskom olovkom.

Ukoliko pogriješite, prekrižite i odgovorite ponovo.

Za vrijeme rada na testu nije dozvoljeno korišćenje rječnika i elektronskih uređaja.

JUN, ŠKOLSKE 2023/2024. GODINE

ŠIFRA UČENIKA

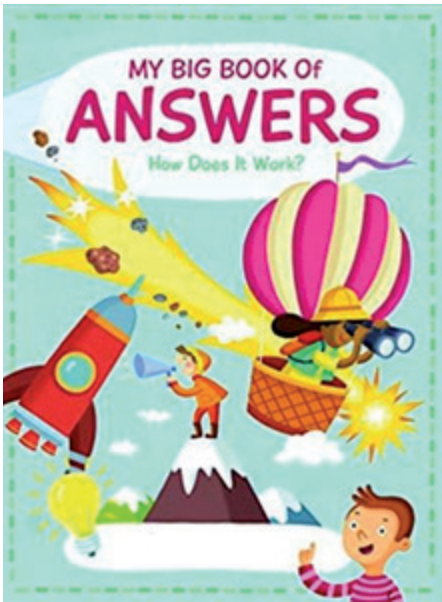

PRAZNA STRANA

1. READING

1.1.

Read the questions and the answers. Then match the questions with their answers. There is one extra questions.

THE EARTH FACT FILE

- 1. Our planet is great. Where did it come from?
- 2. Why is the Earth round?
- 3. Why is the sky blue?
- 4. What are the shooting stars?
- 5. Where does petrol come from?
- 6. Why do volcanoes go 'boom'?
- 7. Why is there day and night?
- 8. Why are there waves?
- 9. Why don't we fall off the Earth?
- 10. Why is the Earth called the third rock from the Sun?
- 11. Why does the ground shake during an earthquake?

- A.** Under the continents and oceans, the Earth's surface is made up of moving plates. Sometimes, these plates run into each other, making those parts shake.
- B.** The Earth spins around the Sun, but it also twirls around itself every 24 hours. At night, your part of the world is turned away from the sun, so the light can't reach you. At that time, it's day on the other side of the world.
- C.** Almost 14 billion years ago, there was a big bang. It created everything in the Universe. Our Earth, Sun and Moon formed much later, 4.6 billion years ago. Today, there are still stars and planets born every now and then.
- D.** The animals and plants that died millions of years ago in the sea, sank to the bottom where they were covered with mud. Through the pressure and the heat of the Earth, they became oil.
- E.** The Earth was made when many asteroids crashed into each other. The Earth became bigger and bigger and gained gravity. Gravity pulls on all sides of the planet, pulling the Earth into its round shape.
- F.** Actually, the sky doesn't have a colour at all. But sunlight has all colours. When it reaches the Earth, the air in our sky spreads all that light.
- G.** Deep inside the Earth, it's so hot that rocks melt. Sometimes, this melted rock (or magma) is pushed up through the centre of a volcano, making a blast. Once it is out of the volcano, the magma is called lava. The lava then cools and becomes rock again.
- H.** These aren't stars, but meteors. A meteor is a rock in space that falls towards the Earth. It burns up in our atmosphere, creating a streak of light.
- I.** The daily tides happen because the Moon pulls on the Earth's water through the Moon's gravity. They are also made by storms and earthquakes.
- J.** Thanks to gravity. This is a force that pulls everything on the Earth towards the ground.

BATMAN FAQs

Batman is one of the world's most famous comic heroes, and he's been around for a while – 85 years in fact! He first appeared in Detective Comics no. 27 in 1939.

He is an ordinary person like you or me. He can't fly, he can't walk on water, and he can't climb buildings by himself. He never uses a gun, and he never kills someone.

He has learned to do some very clever things. He's a brilliant detective and he's very good at martial arts. He fights well and thinks quickly. He's also very good at escaping. And he's got some very special gadgets.

He dresses like a bat to frighten the villains and because bats help him in his fight against crime. The Batsuit is heavy – it's about 30 kilos. It's made of special, thick material. Guns and knives are no good against it. Because it's black, it hides Batman in the night.

Adopted from Batman begins, Schoolastic

A. Circle the right answer for the questions.

- 1. When did Batman first appear?**
- A.** In 1927
 - B.** In 1939
 - C.** In 1985
- 2. Has Batman got special powers?**
- A.** Yes, he has.
 - B.** No, he hasn't.
 - C.** It isn't mentioned in the text.
- 3. How does Batman always win the fight against the crime?**
- A.** He is a brilliant detective.
 - B.** He hides in the dark.
 - C.** He uses a gun and kills people.
